

# Wellness and Health with Hyperbaric Oxygenation

## What is Hyperbaric Oxygen Therapy?

Hyperbaric oxygen therapy is a natural and effective method to saturate your body with oxygen. Oxygen is vital for optimal health and healing.

Proper hyperbaric treatment allows you to comfortably lay inside a see-through oxygen chamber completely surrounded with oxygen for 1½ hours while napping or watching TV.

One of four hyperbaric chambers at BaroMedical

## How is Medical Oxygen Therapy Provided?

The hyperbaric chamber is filled with pure medical grade oxygen and is gradually pressurized up to therapeutic pressure. As the pressure increases, it is normal to experience a mild and temporary "fullness" in the ears.

A course of 10 to 20 sessions over a two- to four-week period will initiate capillary and nerve regeneration, as well as organ repair.

Relieve pain with oxygenation  
.... naturally!

## Testimonials

### Pain management

"I was in unbearable pain for six years. After a month of therapy the pain was gone and the oxygen gave me energy to return to my daily activities without pain medication. It also helped improve my sleep and concentration. Finally enjoying my life again."

Milica S., Burnaby

### Stroke recovery

"Just a few months ago I had a stroke and was in a hospital. I couldn't talk and use my right arm and was in a wheelchair, not improving much. My doctor suggested oxygen therapy.

After 35 sessions I am back to work now playing my instrument professionally. Could not be more grateful! And I am telling everyone."

Doug S., Coquitlam

### Diabetes recovery

"My diabetes caused numbness in my feet and wounds that would open suddenly but not heal for a very long time.

With oxygen therapy my blood glucose finally got under control and my kidney results are better. Best of all I do not have numb feet and I can enjoy dancing again."

Phillip K., Vancouver

### Wound care

"I couldn't cope with pain any more even with 12 painkillers per day. My work and my private life were suffering and I was very depressed until I found oxygen."

"I can't believe the results. I got my life back and I am happy again."

Komelia U., Burnaby

# Revitalize with Oxygen

## Reverse aging • Preserve Vitality

With aging we experience a gradual decline in organ function and their ability to self repair.

**Aging process can be reversed or delayed with absorbing extra oxygen thru a series of hyperbaric oxygen sessions.**

Increased body oxygenation will initiate **neovascularization**, improving blood flow to all organs.

Added oxygen is also crucial for increased production of our own stem cells responsible for organ repair and regeneration.

## Restoring Brain Function

Decline in cognitive function such as in dementia, concussion, TBI or stroke occurs due to poor brain metabolism caused by general hypoxia and inflammation. In response to additional oxygen, brain metabolism will improve and formation of new nerve cells through **neuro-genesis** will facilitate increased mental, cognitive and motor function.

## Sports Injury

"I used oxygen therapy to heal my broken arm and be able to return to my normal life. At age 84, hyperbaric chamber gave me strength and confidence to push the limits I couldn't 20 years ago. It kind of kick started my body."

*Graydon B., New Westminster*

**Triple gold winner of BC Seniors Games 2014**

# Hyperbaric Oxygen Therapy

## Beauty • Wellness

Oxygen is a key component of optimal physical and mental health. Adequate oxygen levels in our body will keep us in balance and protect from effect of aging.

## Healing

Hyperbaric oxygenation is effective natural therapy in pain management and healing of muscles, ligaments, nerves or broken bones. It reduces recovery time and complications after surgery.

## Oxygen Fights Cancer

**Hyperbaric oxygenation slows down cancer growth and metastasis.**

Oxygenation strengthens the immune system and mobilizes the body's defense against cancer growth. It enhances the benefits of radiation and chemo therapy while reducing negative side effects. **A well oxygenated body is more responsive to naturopathic therapy, homeopathic medications and ketogenic diets.**

## Concussion Recovery

"It is so difficult to use words to describe what happened to me. I truly hope others will find the breakthrough that I have found [in hyperbaric oxygen therapy]"

"I want to thank you for all your years of sharing your facilities because if you didn't I wouldn't be where I am today."

*Joy D., White Rock*

Hyperbaric Oxygenation is a unique whole body therapy promoting natural rejuvenation and regeneration for optimal health.

## Hyperbaric Oxygenation For

- ✓ **Neuropathy**, pain and tingling
- ✓ **Wounds** reluctant to healing
- ✓ **Infections**: bacterial, viral, fungal
- ✓ **Inflammation**: arthritis, inflamed bowel (IBS)
- ✓ **Heart attack recovery and prevention**
- ✓ Neuro-rehabilitation: **stroke**, head injury, **concussion**, black mold, dementia
- ✓ **Cancer recovery and prevention**
- ✓ Multiple sclerosis, Fibromyalgia, Chronic Fatigue
- ✓ **Traumatic injuries**: bone & soft tissue, frost-bite
- ✓ Hearing loss, tinnitus

Increased oxygenation, blood flow and stem cells production is essential for organ regeneration, neuro-genesis and reversed aging.

## Stem Cell Therapy

As we age, our stem cells decline in number and regenerative capacity.

A single hyperbaric oxygen therapy session doubles the number of stem cells produced in our body. After four weeks of daily oxygenation the number of rejuvenating cells increases ten times.

Hyperbaric Oxygen Therapy is the **most natural, safe, and cost-effective stem cell therapy** available for organ regeneration and **reversed aging**.
